

Project Initialization and Planning Phase

Date	11 July 2026
Team ID	SWTID-2026-8118
Project Name	RK Health – AI Smart Patient Appointment & Medication Reminder System
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Problem Statements:

PS	Problem Statement (Customer)	I am trying to	But	Because	Which makes me feel
PS-1	A patient managing a chronic condition and medication schedules	keep track of upcoming doctor appointments and dosage timings	I often forget appointment dates and dosage timings when relying on memory or paper notes	no automated cross-checking of history exists	anxious about missing a dose or a visit
PS-2	A clinic front-desk staff member	manage daily appointment bookings for multiple doctors	I have to manually cross-check schedules and update statuses one by one	there is no shared, searchable system	overwhelmed during busy hours
PS-3	A doctor reviewing a patient before a visit	quickly understand a patient's recent health trend and medication adherence	I have to manually flip through paper records or scattered notes	no summarized view of patient history is available	rushed and less confident in fast decisions
