Maximum Marks	4 Marks

Empathy Map

Understanding the patient/caregiver from four perspectives to build a customer-centric solution.

SAYS • “I keep forgetting when my next appointment is.” • “I never know if I already took today's dose.” • “I wish someone would just remind me.”	THINKS • “What if I miss a critical medication?” • “Is my health actually improving?” • “This should not be this hard to track.”
PERSONA Patient / Caregiver (Primary User)	
DOES • Writes appointment dates on paper or phone notes • Calls the clinic to confirm bookings • Sets manual phone alarms for medicines	FEELS • Anxious about missing a dose or visit • Relieved when reminders are automatic • Frustrated by scattered, paper-based tracking
