### Problem-Solution Fit Canvas:

Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience. Fill out the canvas in the respective boxes just below.

The canvas below maps how RK Health's features address the root causes and behaviors of its target users.

|                                                                                                                                                                   |                                                                                                                                                                             |                                                                                                                                                                                            |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1. CUSTOMER SEGMENT(S) [CS]</b><br><br>Patients, caregivers, front-desk staff and doctors at a small-to-mid size clinic                                        | <b>6. CUSTOMER LIMITATIONS</b><br><b>EG. BUDGET, DEVICES</b><br><br><b>EG.</b><br>Limited budget for paid SaaS tools; mostly desktop/mobile browsers, no dedicated IT staff | <b>5. AVAILABLE SOLUTIONS</b><br><br><b>PROS &amp; CONS LIST</b><br>Pros: paid EHR/appointment SaaS tools exist.<br>Cons: costly subscriptions, complex setup, overkill for a small clinic |
| <b>2. PROBLEMS / PAINS + ITS FREQUENCY [PR]</b><br><br>Missed appointments and doses (frequent — daily), manual paper tracking, no unified view of patient status | <b>9. PROBLEM ROOT / CAUSE [RC]</b><br><br>No centralized, low-cost system connecting appointment scheduling with medication tracking and reporting                         | <b>7. BEHAVIOR + ITS INTENSITY [BE]</b><br><br>Patients rely on memory/paper notes (high intensity, daily habit); staff manually cross-check schedules                                     |
| <b>3. TRIGGERS TO ACT [TR]</b><br><br>A missed appointment or missed dose; a doctor asking for medication history at short notice                                 | <b>10. YOUR SOLUTION [SL]</b><br><br>RK Health — a web dashboard for appointments, medications, reports and AI-generated patient summaries, backed by Google Sheets         | <b>8. CHANNELS OF BEHAVIOR [CH]</b><br><br>Online: web dashboard, browser reminders.<br>Offline: in-person clinic visits, phone calls                                                      |
| <b>4. EMOTIONS BEFORE / AFTER [EM]</b><br><br>Before: anxious, disorganized. After: reassured, in control of appointments and medication schedule                 |                                                                                                                                                                             |                                                                                                                                                                                            |
