

AI Prompt Logs

Date	11 July 2026
Team ID	SWTID-2026-8118
Project Name	RK Health – AI Smart Patient Appointment & Medication Reminder System
Maximum Marks	3 Marks

AI Prompt Logs:

Maintaining a structured record of your interactions with Large Language Models ensures reproducibility and tracks your prompt engineering iterations. Document your exact prompts, the system context provided, and the resulting outputs to demonstrate how AI accelerated your development phase.

S · N o	Task / Intent	System Prompt & Context	Exact User Prompt	AI Output Summary	Refinemen ts / Iterations
1	Frontend layout		Generate responsive dashboard layout.	Produced the initial responsive Dashboard HTML/CSS structure used across the app.	
2	Backend connection		Connect frontend with Google Apps Script backend.	Provided the fetch/URLSearchParams pattern used to call the Apps Script Web App endpoint.	
3	CORS fix		Fix CORS issues.	Recommended switching to URLSearchParams-based POST requests instead of JSON to avoid preflight CORS errors.	
4	Request format		Replace JSON POST requests with URLSearchParams.	Refactored request-building code across Appointments and Medications modules.	
5	Appointments module		Generate Appointment CRUD.	Generated create/read/update/delete logic and Apps Script handlers for the Appointments sheet.	
6	Medications module		Generate Medication CRUD.	Generated create/read/update/delete logic and Apps Script handlers for the Medications sheet.	

AI Prompt Logs (continued)

7	Reports module		Implement Reports module.	Produced the Reports table, filters, CSV export and print logic.	
8	AI Summary module		Implement AI Summary module.	Produced the AI Summary UI cards and summary-generation logic.	
9	Data integration		Debug Google Sheets integration.	Helped trace and fix data-mapping issues between the frontend tables and the Sheets columns.	
10	Data formatting		Fix date formatting. / Fix time formatting.	Corrected date/time parsing so values display consistently across Appointments, Medications and Reports.	
11	Quality check		Perform complete project audit.	Reviewed the repository for consistency, dead code and structural issues before submission.	
12	Documentation		Generate production-ready documentation.	Assisted in preparing the project's README and supporting documentation.
