| <b>Project Name</b>  | RK Health – AI Smart Patient Appointment & Medication Reminder System |
| <b>Maximum Marks</b> | 5 Marks                                                               |

### Functional Features Included in the Solution:

Provide a comprehensive list of all functional features that have been successfully integrated into your final solution. This helps evaluators understand the scope of your project, the modules you have developed, and the exact capabilities your application provides to the end users.

|   |                              |                                                                                                     |                      |           |
|---|------------------------------|-----------------------------------------------------------------------------------------------------|----------------------|-----------|
| 1 | Dashboard                    | Real-time overview of appointments, medications, AI summaries and reports                           | Frontend / Dashboard | Completed |
| 2 | Appointment Management       | Create, search, filter, paginate, edit and delete patient appointments with status tracking         | Appointments Module  | Completed |
| 3 | Medication Management        | Create, search, filter, paginate, edit and delete medication records with reminder status           | Medications Module   | Completed |
| 4 | Reports                      | Generate, search, filter, export (CSV) and print patient reports                                    | Reports Module       | Completed |
| 5 | AI Summary                   | AI-generated patient health insights, appointment recommendations and medication adherence analysis | AI Summary Module    | Completed |
| 6 | Search, Filters & Pagination | Consistent search, filter and pagination controls across Appointments, Medications and Reports      | Cross-module         | Completed |
| 7 | Google Sheets Integration    | All CRUD operations read/write directly to Google Sheets via Google Apps Script                     | Backend              | Completed |
| 8 | Export CSV / Print           | Export report and table data as CSV, or print directly from the browser                             | Reports Module       | Completed |

|   |                   |                                                      |                      |           |
|---|-------------------|------------------------------------------------------|----------------------|-----------|
| 9 | Responsive Design | Layout adapts across desktop and mobile screen sizes | Frontend (all pages) | Completed |
|---|-------------------|------------------------------------------------------|----------------------|-----------|
