|----------------------|-----------------------------------------------------------------------|
| <b>Date</b>          | 11 July 2026                                                          |
| <b>Team ID</b>       | SWTID-2026-8118                                                       |
| <b>Project Name</b>  | RK Health – AI Smart Patient Appointment & Medication Reminder System |
| <b>Maximum Marks</b> | 1 Mark                                                                |

### Demonstration of Proposed Features

List each feature proposed in the solution and confirm whether it was demonstrated in the final project, along with supporting evidence and remarks.

| S.No | Proposed Feature                                          | Demonstrated (Yes/No) | Screenshot / Evidence Link                       | Remarks                                                                         |
|------|-----------------------------------------------------------|-----------------------|--------------------------------------------------|---------------------------------------------------------------------------------|
| 1    | Dashboard                                                 | Yes                   | Dashboard.png (screenshot)                       | Live counts for appointments, medications, AI summaries and reports             |
| 2    | Appointment Management (CRUD, search, filter, pagination) | Yes                   | Appointment.png (screenshot)                     | Add/edit/delete with status tracking (Confirmed/Pending/Cancelled)              |
| 3    | Medication Management (CRUD, search, filter, pagination)  | Yes                   | Medication.png (screenshot)                      | Prescription tracking with dosage, frequency and reminder status shown          |
| 4    | Reports (search, filter, export CSV, print)               | Yes                   | Reports.png (screenshot)                         | Reports table with export and print options shown                               |
| 5    | AI Summary (health insights & risk scoring)               | Yes                   | AI_Summary.png (screenshot)                      | AI-generated summaries with risk level and medication adherence shown           |
| 6    | Google Sheets + Google Apps Script Backend                | Yes                   | Verified via live CRUD operations across modules | Confirmed by data persisting on Add/Edit/Delete in Appointments and Medications |
